

Public Health Health and Wellbeing Profile

### Ormsgill

This resource gives an overview of the health profile for wards within Ormsgill.

Inequalities in people's experience of health still present significant challenges in Cumbria, with people in the most affluent areas living up to 20 years longer than those in more disadvantaged circumstances. These unfair and avoidable differences in health between social groups are what we mean by health inequalities. In Cumbria there are a number of areas of concern, including;

- Relatively large numbers of people living in housing that is in poor condition
- High levels of fuel poverty
- A low proportion of the workforce educated to degree level or higher
- Low employment levels amongst people with disabilities
- On average men in Cumbria lose 10 months of life, and women 4.5 months, directly attributable to alcohol
- 50-60 suicides each year.

#### Ward profiles

Administrative geographies – and particularly wards – have traditionally been used for collecting and publishing statistics. Wards are well-established and, unlike Electoral Divisions, they will not change.

Ward profiles enable us to gain a deeper understanding or the differences in health status between areas.

Electoral Division	Wards in Electoral Division	% of Electoral Division's Population that fall within the Ward
Ormsgill	Hawcoat	7.1
	Ormsgill	86.8
	Parkside	6.1

The below data, as well as insights you gain from talking with communities and through working with community groups, are invaluable in gaining an understanding of the health needs and priority in that community.

#### Other sources of data

Area profiles for each district in Cumbria are available from: <u>www.apho.org.uk/resource/view.aspx?QN=HP\_RESULTS&GEOGRAPHY=16</u> Cumbria Intelligence Observatory: <u>www.cumbriaobservatory.org.uk/</u>
