Subject: managing radioactive waste safely - a framework for implementing geological disposal

With reference to your letter of consultation on the above which was discussed by Greystoke parish council at a recent meeting. The parish council feels that the matter is one for the individual districts to decide, not the county. It has no issues with Copeland Borough Council expressing an interest in its own right and does not support the county council expressing a separate interest.

Would you also please note that I am the parish council's point of contact for any future correspondence or engagement in developing an understanding of opinion within the county.

Yours faithfully

Jennifer Foote

Greystoke Parish Clerk
