

Consultation on Braystones and Sellafield: potentially suitable sites for new nuclear power

The Government is consulting on its draft Nuclear National Policy Statement (NPS) and a list of sites, including Braystones and Sellafield, that might be suitable for nuclear power stations.

The draft Nuclear NPS explains the assessment of sites, why new nuclear power is needed, and the Government's policy on managing radioactive waste safely. The NPS will set the framework for planning decisions on new nuclear power stations.

Your views can make a difference.

How do I take part in the consultation?

Your comments are valuable, so make sure your voice is heard.

- Visit the local exhibition
- Register to take part in the public discussion at www.nuclear-nps-events.info
- Read the documents at www.energynpsconsultation.decc.gov.uk
- Respond to the consultation online, by post or at an event.

The Government wants to hear your views!
