Appendix to May Labour Market Briefing

This appendix contains April ward level data for the Claimant Count/Rate and the Universal Credit Count for each of the 6 districts in Cumbria. It also includes district, LDNPA and county level data for the Claimant Count by age/gender and the UC count by Conditionality Group.

For more information please contact:

Ginny Murphy
Cumbria County Council

ginny.murphy@cumbria.gov.uk

Important Notes:

Claimant Count – this is a measure of the number of people claiming benefits who are available for and actively seeking employment. It is a count of JSA claimants (contribution based and income based) plus Universal Credit claimants in the Searching for Work conditionality group. The count is taken on the second Thursday of each month. This may include some furloughed/self-employed/self-isolating people (see note below).

Universal Credit – this is a count of all Universal Credit claimants in any conditionality group (including those not working and those in work). The count is taken on the second Thursday of each month. This will include some furloughed/self-employed/self-isolating people (see note below).

***Impact of Universal Credit rollou*t** – under Universal Credit, a broader span of claimants are required to look for work than under Jobseeker's Allowance and this can cause discontinuities over time and between areas due to the nature of the rollout.

Impact of Coronavirus on the statistics - ONS have provided the following comment in response to our enquiry about how furloughed/self-employed/self-isolating claimants will have been classified.

If, as a result of being furloughed/not being able to work or working less as self-employed, a claimant's income falls below certain thresholds, then they would fall within the "searching for work" category and would therefore be within the Claimant Count. There are also those who are required to self-isolate, who are not entitled to SSP, who have been directed to claim UC who would also fall within the "searching for work" category and therefore included in the claimant count. As a result:

- *Not everyone ending up in the Claimant Count is going to be unemployed – there are going to be some people (and probably more than usual) who are employed.*
- *Not everyone who is employed and furloughed etc, but made a new claim for benefits, will end up in the Claimant Count.*
- *ONS has no way of knowing how much of the Claimant Count is employed or unemployed at present.*
- *JSA has also increased because some people are better off going with contribution based JSA rather than UC.*
