Labour Market Briefing July 2020

Appendix to July Labour Market Briefing

This appendix is a supplement to the standard Labour Market Briefing and contains June's ward level data for the Claimant Count/Rate and the Universal Credit Count/Rate. As well as the data for the most recent month, it also shows the change from last month and from March (which is treated as the baseline position before COVID-19 lockdown).

Important Notes:

Claimant Count – this is a measure of the number of people claiming benefits who are available for and actively seeking employment and is therefore the best measure of labour market conditions. It is a count of JSA claimants (contribution based and income based) plus Universal Credit claimants in the Searching for Work conditionality group. Due to the easing of UC jobsearch conditions during the Covid-19 pandemic, this will include some furloughed/self-employed people who have jobs and are claiming top-up benefits.

Universal Credit – this is a count of all Universal Credit claimants in any conditionality group, including those not working, not seeking or able to work and those claiming whilst in work. It is therefore most appropriately used as a measure of income deprivation rather than specifically as a labour market measure.

For both datasets, the count is taken on the second Thursday of each month and data published the following month.

For more information please contact:

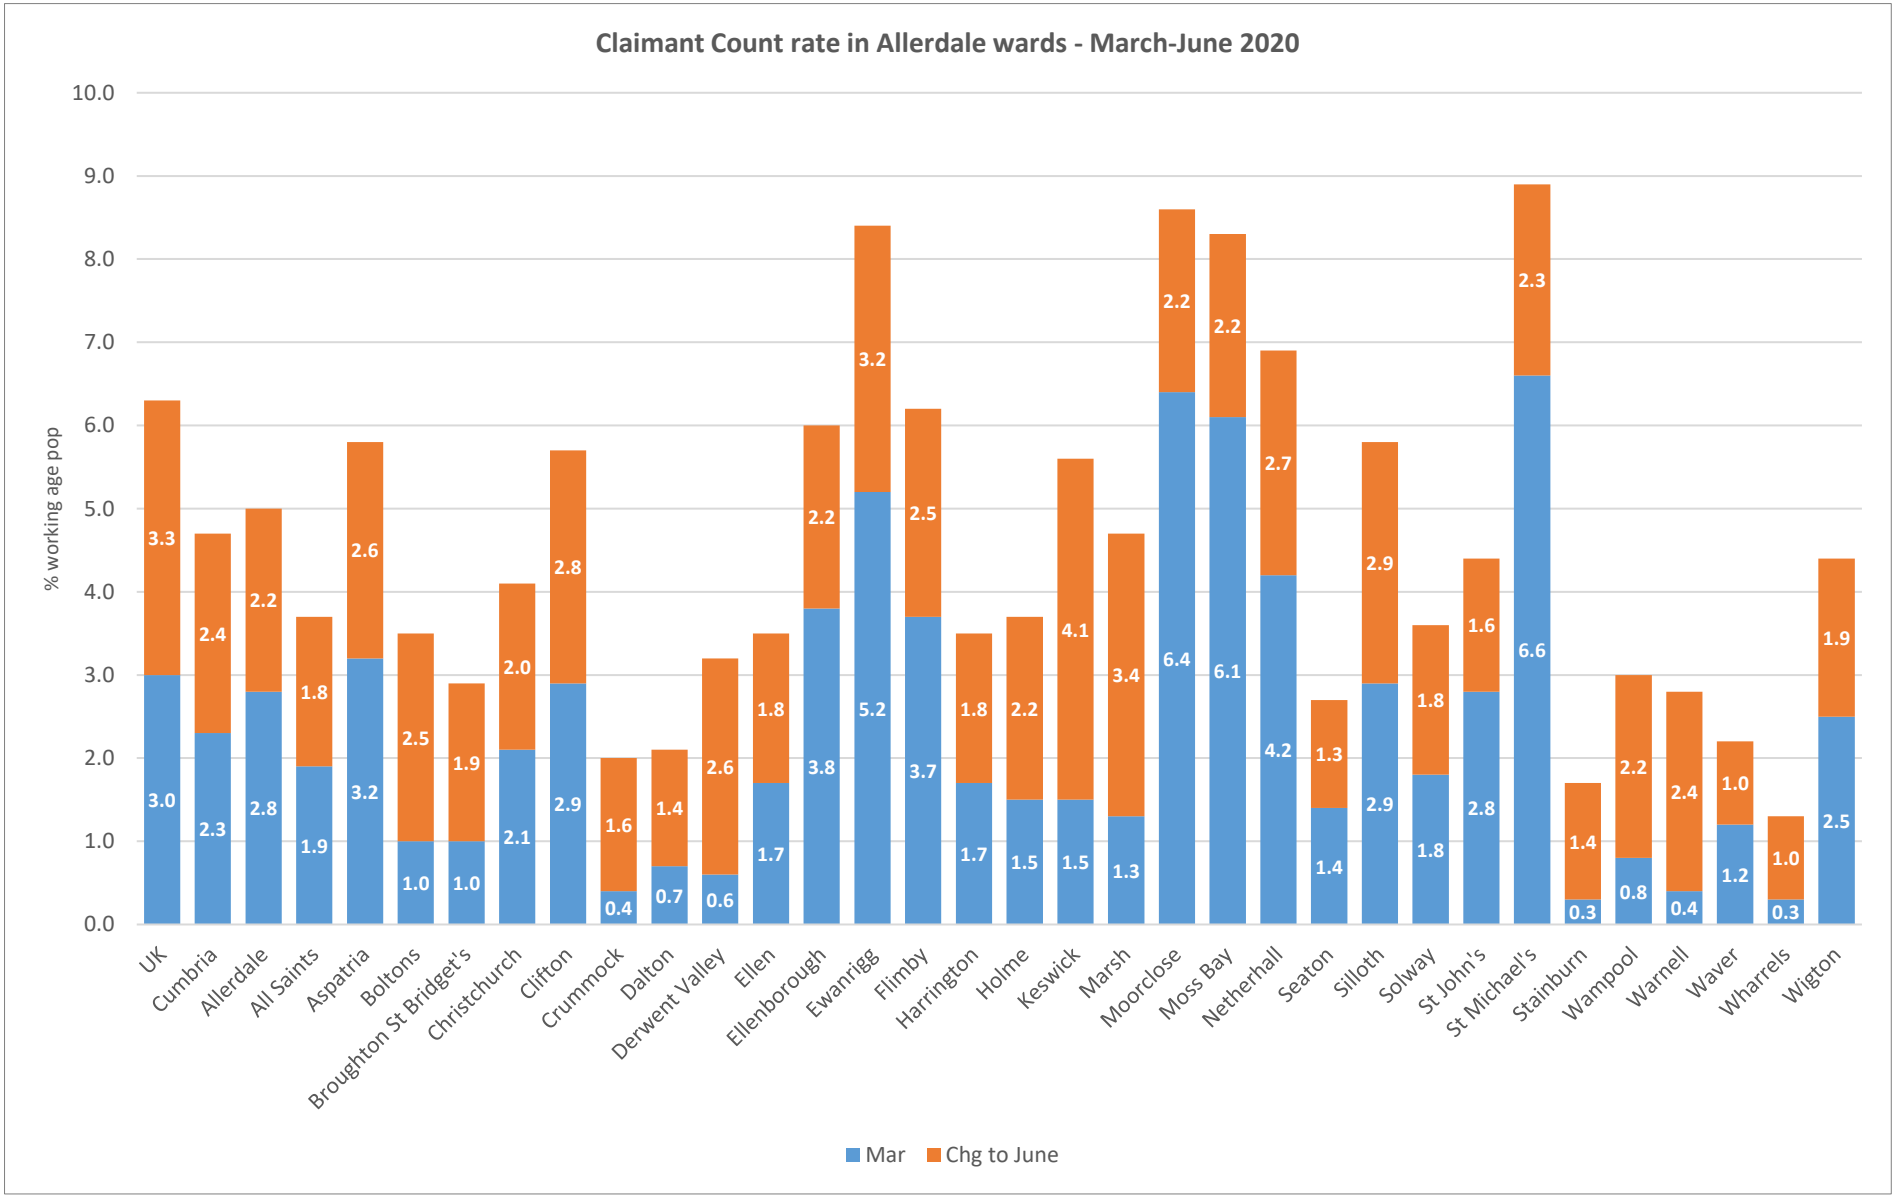

Ginny Murphy
Cumbria County Council
