

Appendix 1 to Dec 2021 Labour Market Briefing – Ward Claimant Data

This appendix is a supplement to the standard Labour Market Briefing and contains the latest ward level data for the Claimant Count/Rate and the Universal Credit Count/Rate. The ward data shown in the tables is for 2019 administrative wards.

Maps showing the unemployment rate data at different geographic levels and by age and gender are available by using the data explorer on the Cumbria Intelligence Observatory website (<https://www.cumbriaobservatory.org.uk/data-catalog-explorer/>) Unfortunately similar maps for the broader Universal Credit claimant rate are not available on the site.

Important Notes:

Claimant Count (Unemployment) – this is a measure of the number of people claiming benefits who are available for and actively seeking employment and is therefore the best measure of labour market conditions. It is a count of JSA claimants (contribution based and income based) plus Universal Credit claimants in the Searching for Work conditionality group. Due to the easing of UC jobsearch conditions during the Covid-19 pandemic, this will include some furloughed/self-employed people who have jobs but are claiming top-up benefits (although most will be counted in the broader UC count rather than the unemployment count).

Universal Credit – this is a count of all Universal Credit claimants in any conditionality group, including those not working, not seeking or able to work and those claiming whilst in work, including most of those who are furloughed and claiming top-up benefits. It is therefore most appropriately used as a measure of income deprivation rather than specifically as a labour market measure.

For both datasets, the count is taken on the second Thursday of each month and data published the following month.
