

# Cumbria Community Risk Register 2017-18

This is the Cumbria Community Risk Register. It has been put together by representatives from the Cumbria Resilience Forum (CRF). We use this risk register to help us prioritise our work in planning for emergencies and exercising our plans.

Reviewed 21st May 2018

## What we're doing:

The County Council Resilience Unit and partners from the Cumbria Resilience Forum maintain a well established 'Cumbria Emergency Plan' which contains comprehensive general arrangements for responding to emergencies in Cumbria. It guides us in how to deal with the sort of emergencies identified in this risk register. We also have specific plans for some Very High and High risks – for example, a Pandemic Influenza Plan and a Flood Plan. All the organisations involved in the Cumbria Resilience Forum (For example: Police, Ambulance, Fire Service, Local Authorities and NHS England) regularly train together and exercise our plans. This means we are ready to respond when we need to.

## What you can do:

We don't like to think about emergencies happening, but nowhere is totally safe. An emergency can happen anywhere. What would you do if the Police knocked on your door in the middle of the night to ask you to leave your home because of the danger of a nearby emergency? Would you be ready?

Families and households can and do cope with emergencies by preparing in advance and working together as a team. Knowing what to do is your best protection and your responsibility

The chances of being involved in a major emergency are low however, it could happen. The following outline the key things you can do to help prepare you and your family in the event of a major emergency.

- Think about the type of major emergencies that could affect you and your family
- Think about what hazards and risks you face in your home and take action to reduce the risk to your family
- Develop a household *PLAN* for responding to an emergency
- Prepare the equipment, food and water you will need
- Make sure your children know what to do in the event of a major emergency and practice your emergency plan
- Don't forget the safety of your family pet
