

Good Practice Catalogue

The CSCP is collecting examples of good practice from the frontline. Specifically, we would like to collect examples of interventions (single or multi-agency) which have made or are making a positive impact on a child or young person's situation.

We will use submissions to develop a good practice catalogue. This catalogue will act as a 'learning system', by encouraging us all to reflect on our practice and then plan for improvement. Your feedback and examples are essential and we can turn these into progress and improvement.

Some common themes when looking at good practice are leadership, partnership working, engagement between young people and frontline staff, planning, relationships between agencies and staff, learning from serious case reviews, multi-agency training and learning etc.

We are happy to accept anonymous examples of good practice if you prefer. If you do not want us to publish your example please tick the box below:
