

# V1 Visitors Screening Questionnaire

## Appendix A

Welcome to.....

Current Government Guidance: Please don't enter a care service if you are feeling unwell, even if you have tested negative for COVID-19, are fully vaccinated and have received your booster. Transmissible viruses such as flu, respiratory syncytial virus (RSV) and norovirus can be just as dangerous as COVID-19. If you have any symptoms that suggest other transmissible viruses and infections, such as cough, high temperature, diarrhoea or vomiting, you should avoid visiting until 5 days after you feel better.

PLEASE ANSWER THESE QUESTIONS	YES/NO
Symptoms of COVID-19, flu and common respiratory infections include continuous cough, high temperature, fever or chills, loss or change in your normal sense of taste or smell, shortness of breath, unexplained tiredness, lack of energy, muscle aches or pains that are not due to exercise, not wanting to eat or not feeling hungry, headache that is unusual or longer lasting than usual, sore throat, stuffy or runny nose, diarrhoea, feeling sick or being sick. <b>Please confirm you do not have any symptoms before visiting.</b>	
Can you confirm you have not had a positive test for Covid 19 in the last 10 days?	
Do you agree to comply with the infection prevention and control measures?  Visitors are requested to wear a face mask when visiting a care home, particularly when moving through the home.	

Please ask for any support and/or guidance from staff members about following the required infection control measures and putting on and taking off PPE.

**Please laminate for use with all visitors to the service**
