

Cumbria Health Protection Tactical Oversight Group Weekly COVID-19 Summary

2021 Week 16 (Ending Friday 23rd April)

Summary Produced Wednesday 28th April

Weekly Summary: Key points

2021 Week 16 (Ending Friday 23rd April)

Cases & Demographics

Key Points for Cumbria and districts in 2021 Week 16 (Ending Friday 23rd April):

- There were 59 new cases in Cumbria (a decrease of 16, -21%, from 75 cases in the previous week);
- For the 2nd week in a row, South Lakeland had the greatest number of new cases (+16 new cases);
- However, Eden replaced South Lakeland in having the highest rate of new cases (19 new cases per 100k population);
- Rates in all Cumbrian districts were below both the national and regional average rates (25 and 24 new cases per 100k population respectively);
- New cases decreased from the previous week in all Cumbrian districts except Eden and Copeland;
- New cases increased in Eden and Copeland by +150% and +71% respectively, though it should be noted that numerically these increases were small;
- The 12-18 age group accounted for the greatest number and rate of new cases in Cumbria;
- The 12-18 age group experienced an increase in new cases from the previous week (from 7 cases in week 15 to 17 cases in week 16).

Health & Hospitalisations

Summary for week ending Tuesday 27th April:

- The number of new patients admitted with COVID-19 Positive status in both North Cumbria Integrated Care (NCIC) and University Hospitals of Morecambe Bay NHS Foundation Trust (UHMB) decreased;
- The average number of patients with COVID-19 in beds remained the same in NCIC, while the average number of patients with COVID-19 in beds decreased in UHMB.

Mortality

- Up to Friday 16th April 2021, the number of COVID-19 related death *registrations* and death *occurrences* remained the same compared to the previous week; it should be noted that numbers of deaths are very small

Impact on Sectors

- The situation in care homes remains stable with no outbreaks;
- The situation in education settings remains stable with low numbers of incidents and cases.

R estimates & Growth Rates

NHS Region

Region	R	Growth rate % per day
England	0.8 to 1.0	-5 to -1
East of England*	0.8 to 1.1	-5 to 1
London*	0.8 to 1.1	-5 to 1
Midlands*	0.7 to 0.9	-7 to -3
North East and Yorkshire	0.7 to 1.0	-6 to -1
North West*	0.7 to 0.9	-7 to -2
South East*	0.7 to 0.9	-6 to -2
South West*	0.7 to 1.1	-6 to 0

Source: gov.uk. Friday 23rd April 2021.
North Cumbria falls within the North East and Yorkshire region.

The values are shown as a range, the most likely true values are somewhere towards the middle of this range.

*Particular care should be taken when interpreting these estimates, as they are based on low numbers of cases and/or dominated by clustered outbreaks. They should not be treated as robust enough to inform policy decisions alone.

Cases

Key Points for Cumbria and districts in 2021 Week 16 (Ending Friday 23rd April):

- There were 59 new cases in Cumbria (a decrease of 16, -21%, from 75 cases in the previous week);
- For the 2nd week in a row, South Lakeland had the greatest number of new cases (+16 new cases);
- However, Eden replaced South Lakeland in having the highest rate of new cases (19 new cases per 100k population);
- Rates in all Cumbrian districts were below both the national and regional average rates (25 and 24 new cases per 100k population respectively);
- New cases decreased from the previous week in all Cumbrian districts except Eden and Copeland;
- New cases increased in Eden and Copeland by +150% and +71% respectively, however, it should be noted that numerically these increases were small.

Weekly Summary: COVID-19 : New Cases: Number and Rate Per 100,000 Population

ID	Area	Previous Week*	Previous Week*	Current Week**	Current Week**	Weekly No. Change in New Cases	Weekly % Change in New Cases

 Please be aware that the data is collected as a 'sitrep' on the day and is not refined retrospective reporting data. It is susceptible to error caused by delays in data entry and as simple admin errors. There is no mechanism for updating or correcting any such occurrences with NHSE/i - the prime recipient.

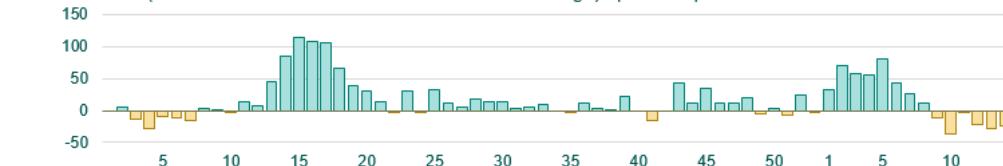

Mortality: Cumbria Weekly Registered and Occurred Deaths to Week 15 (up to 16th April 2021)

Week 15 2021: Cumbria CC, registered deaths

Excess deaths (2020 and 2021 deaths minus 2015 to 2019 average) up to 16 April 2021

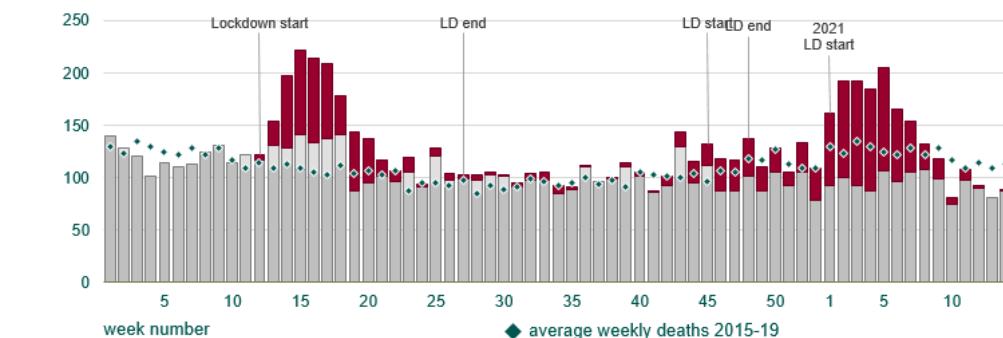

Greater than the 5 year average

Note - values for deaths occurring for the most recent week are likely to be lower than the final values due to the time lag in reporting.

Less than the 5 year average

All deaths in 2020 by week, with proportion where COVID-19 is mentioned

COVID-19 mentioned on the death certificate

Values for 2021 are still compared to the average for the years 2015-19 due to the impact of COVID-19 in 2020.

Registered deaths for week 1 should be treated with caution because of potential registration delays from the Christmas period.

COVID-19 not mentioned

Data source: ONS Death registrations and occurrences by local authority and health board. Produced by LKIS, Public Health England
Office for National Statistics, licensed under the Open Government Licence.

In line with the ONS method, deaths for week 53 have been compared to the average for week 52.

Due to issues with calculation, the average for registered deaths for week 1 2015-19 has been taken to be the same as for week 2 2015-19

Registered deaths in week 15 = 118

Excess registered deaths in week 15 (using 2015-19 weekly averages) = 4

Registered deaths mentioning COVID-19 in week 15 = 2

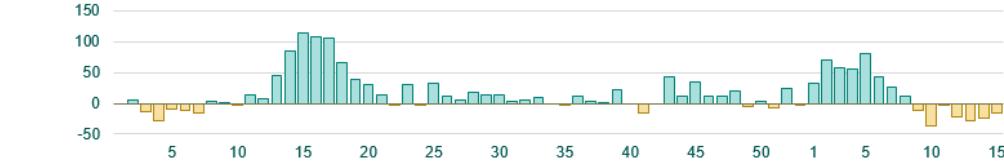

Registered deaths mentioning COVID-19 in weeks 1 2020 to 15 2021 = 1,488

Registered deaths for week ending 16 April 2021	2019 population	2020 deaths COVID-19 mentioned	Crude rate ¹ 100,000
England	56,286,961	346	0.61
North West ONS region	7,341,196	51	0.69
Cumbria CC	500,012	2	0.40

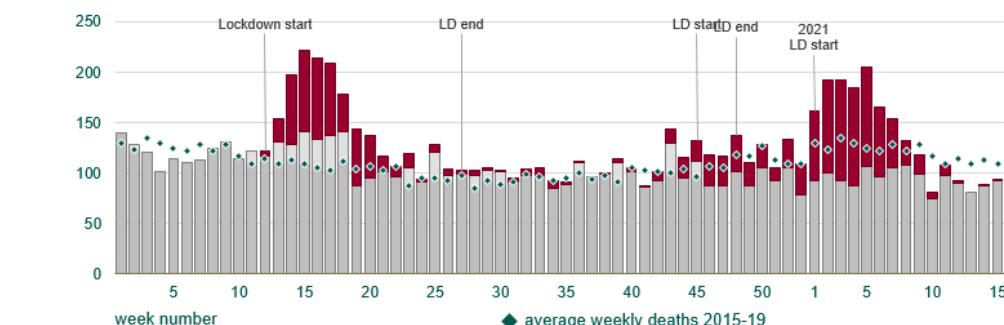

Source: Office for National Statistics. Produced by LKIS, Public Health England.

Week 15 2021: Cumbria CC, death occurrences

Excess deaths (2020 and 2021 deaths minus 2015 to 2019 average) up to 16 April 2021

All deaths in 2020 by week, with proportion where COVID-19 is mentioned

In line with the ONS method, deaths for week 53 have been compared to the average for week 52.

Due to issues with calculation, the average for registered deaths for week 1 2015-19 has been taken to be the same as for week 2 2015-19

Death occurrences in week 15 = 94

Excess death occurrences in week 15 (using 2015-19 weekly averages) = -15

Death occurrences mentioning COVID-19 in week 15 = 2

Death occurrences mentioning COVID-19 in weeks 1 2020 to 15 2021 = 1,492

Death occurrences for week ending 16 April 2021	2019 population	2020 deaths COVID-19 mentioned	Crude rate ¹ 100,000
England	56,286,961	193	0.34
North West ONS region	7,341,196	36	0.49
Cumbria CC	500,012	2	0.40

Notes: Vaccinations as a % of the resident population within that age group, 16+ population is used as the denominator for vaccines for the 'all ages' ages group.

The proportion of population receiving vaccination may exceed 100% due to the use of Office National Statistics population estimate to allow consistent comparison.

Data Period: 8th December 2020 to 18th April 2021. Published 22nd April 2021.

Vaccination – Proportion with at least 1 dose given District comparison to Local Authorities with similar statistical profiles

COVID-19 Vaccinations by Place of Residence and Age Group
