

Cumbria Health Protection Tactical Oversight Group Weekly COVID-19 Summary

2021 Week 19 (Ending Friday 14th May)

Summary Produced Wednesday 19th May

Weekly Summary: Key points

2021 Week 19 (Ending Friday 14th May)

Cases & Demographics

Key Points for Cumbria and districts in 2021 Week 19 (Ending Friday 14th May):

- There were 41 new cases in Cumbria (an increase of 21, +105%, from 20 cases in the previous week);
- South Lakeland had the greatest number of new cases (+14 new cases);
- Copeland replaced Barrow-in-Furness in having the highest rate of new cases (15 new cases per 100k population);
- However, rates in all Cumbrian districts were below both the national and regional average rates (21 and 37 new cases per 100k population respectively);
- New cases increased from the previous week in all Cumbrian districts except Carlisle;
- South Lakeland had the greatest numerical increase in new cases (up by 10 from 4 new cases in week 18 to 14 new cases in week 19);
- The 12-18 age group accounted for the greatest number of new cases in Cumbria (+11 new cases), followed by the 19-24 and 30-39 age groups (both +8 new cases);
- The 12-18 and 19-24 age groups also accounted for the greatest rates of new cases in Cumbria;
- The 19-24 and 30-39 age groups experienced the greatest numerical increases in new cases from the previous week;
- Notably, for the 3rd week in a row, there were no new cases in the 70-79 and 0-4 age groups, there were also no new cases in the 60-69 age group;
- However, there were 5 new cases in the 80+ age group following a fortnight of no cases in this age group.

Health & Hospitalisations

Summary for week ending Tuesday 18th May:

- There were no new patients admitted with COVID-19 Positive status and no patients with COVID-19 in beds in North Cumbria Integrated Care (NCIC);
- Both the number of new patients admitted with COVID-19 Positive status and the average number of patients with COVID-19 in beds in University Hospitals of Morecambe Bay NHS Foundation Trust (UHMB) increased very slightly.

Mortality

- In the week to Friday 7th May 2021 there were no COVID-19 related death occurrences in Cumbria.

Impact on Sectors

- The situation in care homes remains stable with very low numbers of current outbreaks;
- The situation in education settings remains stable with very low numbers of incidents.

R estimates & Growth Rates

NHS Region

Region	R	Growth rate % per day
England	0.8 to 1.1	-3 to 1
East of England	0.8 to 1.1	-5 to 1
London	0.8 to 1.0	-4 to 0
Midlands	0.8 to 1.0	-3 to 0
North East and Yorkshire	0.8 to 1.0	-4 to 0
North West	0.8 to 1.1	-3 to 2
South East	0.8 to 1.0	-5 to -1
South West	0.8 to 1.1	-4 to 1

Source: gov.uk. Friday 14th May 2021.
North Cumbria falls within the North East and Yorkshire region.

The values are shown as a range, the most likely true values are somewhere towards the middle of this range.

*Particular care should be taken when interpreting these estimates, as they are based on low numbers of cases and/or dominated by clustered outbreaks. They should not be treated as robust enough to inform policy decisions alone.

Cases

Key Points for Cumbria and districts in 2021 Week 19 (Ending Friday 14th May):

- There were 41 new cases in Cumbria (an increase of 21, +105%, from 20 cases in the previous week);
- South Lakeland had the greatest number of new cases (+14 new cases);
- Copeland replaced Barrow-in-Furness in having the highest rate of new cases (15 new cases per 100k population);
- However, rates in all Cumbrian districts were below both the national and regional average rates (21 and 37 new cases per 100k population respectively);
- New cases increased from the previous week in all Cumbrian districts except Carlisle;
- South Lakeland had the greatest numerical increase in new cases (up by 10 from 4 new cases in week 18 to 14 new cases in week 19).

 Please be aware that the data is collected as a 'sitrep' on the day and is not refined retrospective reporting data. It is susceptible to error caused by delays in data entry and as simple admin errors. There is no mechanism for updating or correcting any such occurrences with NHSE/i - the prime recipient.

Mortality: Cumbria Weekly Registered and Occurred Deaths to Week 18 (up to 7th May 2021)

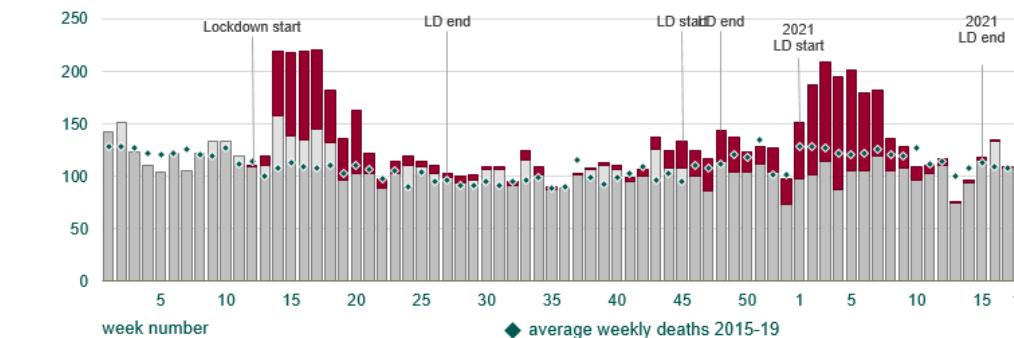

Week 18 2021: Cumbria CC, registered deaths

Excess deaths (2020 and 2021 deaths minus 2015 to 2019 average) up to 7 May 2022

All deaths in 2020 by week, with proportion where COVID-19 is mentioned

Greater than the 5 year average

Note - values for deaths occurring for the most recent week are likely to be lower than the final values due to the time lag in reporting.

Less than the 5 year average

COVID-19 mentioned on the death certificate

Values for 2021 are still compared to the average for the years 2015-19 due to the impact of COVID-19 in 2020.

Registered deaths for week 1 should be treated with caution because of potential registration delays from the Christmas period.

COVID-19 not mentioned

Notes: Vaccinations as a % of the resident population within that age group, 16+ population is used as the denominator for vaccines for the 'all ages' ages group.
The proportion of population receiving vaccination may exceed 100% due to the use of Office National Statistics population estimate to allow consistent comparison.
Data Period: 8th December 2020 to 9th May 2021. Published 13th May 2021.

Vaccination – Proportion with at least 1 dose given District comparison to Local Authorities with similar statistical profiles

COVID-19 Vaccinations by Place of Residence and Age Group
