

# Barrow Library Fly-through script

## Redesign of the Barrow Library Building

This sneak peek video shows the exciting changes that are taking place within the Barrow Library building to make it one of Cumbria County Council's flagship customer connect buildings.

The redesign includes a number of customer touch down points where staff can deal with a wide range of customer enquiries.

There's also a new glazed, soundproof pod which provides a more private space for services such as blue badge applications.

The superb new sensory room provides a safe space for families with young children that have additional needs.

The building now includes a range of meeting rooms which can be booked for either large or small gatherings.

The new changing places and show room provide extra space and accessible toilets to meet the needs of people with disabilities, their family and their carers.

The exciting new children's library includes stunning bespoke ship book shelving, flying seagulls and an incredible tree shaped seating area.

It provides the perfect space for creativity, storytelling and play.

We can now deliver Adult Education Courses from right here in the library using the lovely new Community Learning and Skills room.

The Community Space offers real flexibility for a range of events such as exhibitions, theatre performances or local bands.

The Archive centre remains a much loved and well used asset and has been redesigned to allow customers to enjoy all it has to offer.

The new IT suite provides free, bookable online access to anyone who needs it.

The new dedicated local studies room is now available five days a week, providing easy access to a range of records and documents.

The fantastic Teen Zone is a space only for teenagers where they can come together, chat, use the Wi-Fi, charge up or just chill out on the comfy snug seating.

The Barrow Library Redesign project will deliver a brilliant new space for all the community.

Work is due to complete in late Summer 2021 and a celebration event showcasing the incredible changes will take place in September.
