

Online Safety

Being IT and APP Aware- A Parents' Guide 2021

Do you know what APPs your child accesses on their mobile or Wi-Fi device? Do you know what these applications do? What are the positives and the risks? This site is constantly updated with news and advice.

This site in partnership with the NSPCC helps parents stay up to date on websites/apps and games that your child may be using. It has resources to support your child to learn how to keep safe online and aid discussions for under 13s and over 13s. They are in different languages too. It has a new SEND Online Safety Hub, specifically for parents of children with SEND.

So, if you need to know about games, or overall safety ratings of new apps, well worth taking a look.
