

- Notes:
- The information shown is without obligation or warranty, and is a general guide to the location of Statutory Undertakers' apparatus. No guarantee is given to its accuracy. It should not be relied upon in the event of excavation or other works undertaken near to the assumed position of the apparatus shown. No liability of any kind whatsoever is accepted by Capita for any error or omission.
 - It is recommended that excavation in close proximity to Public Utility apparatus should be undertaken by hand. This should be allowed for in the rates for excavation.
 - The location of individual service connections to properties are not shown on the drawing, but must be anticipated.
 - Contractor should supply a trial hole report, containing photographs of each excavation, levels of identified utilities and any other apparatus within excavation.
 - Contractor where possible should obtain CBR values from within the excavations, this may not be possible due to presence of services. Results should be highlighted within the trial hole report.
 - Soil Samples should be taken for contamination testing, Contractor to confirm presence of hazardous materials.
 - Road cores should identify the existing construction of the carriageway, within the report the Contractor should highlight presence of tar.
