Serving
Schools in
Cumbria

Library Development Service

Supporting Reading for Pleasure, Learning and Literacy

“Can I just say a HUGE thanks to you and your colleagues for the tremendous work you have done in the library - it looks amazing!
What a difference!

South Walney Junior School

Library Development Service

Library Services for Schools can help you to create an exciting and inviting library space where children will want to enjoy reading in an attractive and welcoming environment.

Ensure you have good quality, up to date books that will entice children into your library and stimulate their imaginations. We will remove any out of date and damaged titles and if you need to invest in new stock we will give you advice about what to buy. We can also review your classroom stock.

Enable children to browse, explore and discover with confidence. We will make your library more accessible with clear guiding, labelling and face forward displays.

Help pupils become self motivated and independent learners. We can show them how to use the library effectively and find what they're looking for quickly. Skills that can be transferred to any library environment.

Get the most out of your computerised library management system. We can train staff and pupils and can also catalogue your books saving you considerable time.

Our service is fast, flexible and cost effective, offering you great value for money. One day may be all it needs to make a real difference!

Whether you want advice, need practical hands-on help or want to breathe new life into your existing library - our team are here to help

School libraries - at the heart of teaching and learning
